COLLECTION

Cellular Shade Collection

Features

Maxxmar cellular shades are available in a wide assortment of fabric choices ranging from plain through decorative patterns, textures and opacities. Available in 3/8" and 3/4" single cell as well as double cell.

Additional features:

- 100% polyester fabric is both anti-static and dust repellent.
- Soft hand fabric provides for better insulation, sound absorption and protects against harmful U.V. rays from the sun.
- The fabric is mould resistant making it ideal for high humidity areas such as bathrooms, kitchens and sunrooms.
- Consistent street side feature creates uniformity to the exterior.
- Our easy to use cord lock allows for simple operation and can be placed on either the left or right side.
- Colour coordinated aluminum headrail
- **Cord Loop System** makes it easy to lift the shade allowing exact positioning of where the shade is to rest. It also eliminates cord puddling of the lift cord when in the open position.
- **Top down/bottom up feature available** - allows the shade to be lowered from the top and raised from the bottom.
- **Cordless operation** eliminates visible lift cords and can be easily maneuvered with a touch of a finger, making the feature child safe.
- Additional **specialty options** for cellular shades include day/night shades, two shades on one headrail, angle top, arch, circle, hexagon, octagon, trapezoid and skylight shades.
- Concealed cords within the shade prevents fabrics from sagging and keeps a clean crisp pleat design.
