

Features

Innovative unique patent pending concept of Tru Dual Closure™

Somerset™ Shutters are made with an exclusive PolySilk compound containing whitening agents and optimum levels of titanium dioxide.

The colour is embedded throughout the PolySilk compound.

The exclusive Enduralink™ connectors are used to attach the louvers to the tilt bar. No staples are required.

Computerized positioning of the louvers permits variable equidistant placement of the louvers.

Three louver sizes.

Insulator. 

A wide variety of colours to choose from.

Fashionable Concealed System provides a very aesthetically pleasing appearance.

Surca™ Locking System.

Maxx Gear System

Water resistant. 

Exclusive Unisplit™ feature. 

Bacteria Free. 

PolySilk design.

EnviroGreen™. 

Wide variety of decorative frames for inside and outside mounts.

Low maintenance and easy to clean.

Designed with Child Safety Features. 

Lifetime Limited Warranty.

Benefits

An advanced revolutionary feature designed to obtain the best optimum louver closure on a shutter panel in both directions (up and down positions).

This specially formulated PolySilk compound endures the effects of ultraviolet rays and the elements. They will not fade, chip, crack or peel.

Never requires sanding, painting or staining. Normal use scratches and dents do not affect the finish or the colour. Excellent for high traffic areas.

Enduralink™ connectors provide outstanding strength allowing the louvers to close tightly in both directions and eliminating callbacks due to breakage.

With computerized positioning of the louvers, varying height shutters in the same room will have the same uniform appearance which is very aesthetically appealing to the eye. Same size rails also can be used on all shutters, with the divider rail placed within 3/4" of the desired position.

Somerset™ Shutters are available in 2 1/2", 3 1/2" and 4 1/2" louver sizes to optimize the view out of your window.

Helps reduce heating and air conditioning costs and reduces outside noise.

Somerset™ Shutters will coordinate with any type of furniture or décor. Available in 5 colours from cool whites, to soft creams to rich mocha.

The Concealed System in the louvers, stiles, and the tilt bar are inset and invisible. This provides a sleek, elegant, aesthetically pleasing look.

The Surca™ Locking System is standard on Somerset™ Shutters. This adjustable locking mechanism eliminates the need for magnets and saves time on installation. The self-leveling feature ensures that the panels remain level while closed. The rust proof spring enables the Surca™ Locking System to be used in high humidity and salty environments.

The most revolutionary gear system on the market for functionality and performance. Eliminates the need for a tilt bar and maximizes your unobstructed view out of the window or opening. It gives the shutters a sleek, elegant, modern look and will satisfy any customer including the most sophisticated.

Resists the damaging effects of moisture making it a perfect choice for kitchens, bathrooms, jacuzzi, pools and any wet, humid or salty environments.

The exclusive Unisplit™ feature on the tilt bar allows for greater privacy and permits full or partial light control on the shutter.

Our exclusively formulated compound does not promote the growth of fungus or bacteria.

Somerset™ Shutters utilize extremely strong hinge connectors and the ultra strong PolySilk design. Aluminum reinforcement as required.

Environmentally friendly shutters that meet regulations regarding formaldehyde and VOC emissions. Somerset™ Shutters are 100% recyclable, not adding to our waste management issues.

Admirable and fashionable frames provide an exquisite appearance for all rooms. These frames solve "out-of-square openings".

Somerset™ Shutters can be cleaned with ordinary soap and water. Regular cleaning enhances the surface finish of the PolySilk compound.

Somerset™ Shutters contain no cords which could be harmful to a child. Standard three (3) leaf removable hinge recommended for child and pet safety.

We believe our product will be a permanent part of your collection for years to come. A simple promise that is backed by our 25 years of team innovative experience in the marketplace.
